Operating Revenues

Operating revenues increased \$70.4 million, or 19%, to \$450.5 million in the three months ended December 31, 2021 compared to \$380.1 million in the three months ended December 31, 2020.

Operating revenues derived from listed derivatives increased \$5.6 million, or 6%, to \$100.6 million in the three months ended December 31, 2021 compared to \$95.0 in the three months ended December 31, 2020. This growth was primarily driven by a 7% increase in the average rate per contract, principally due to an improved performance in our Commercial segment, which was partially offset by an overall 1% decline in listed derivative contract volumes.

Operating revenues derived from OTC transactions increased \$22.5 million, or 93%, to \$46.7 million in the three months ended December 31, 2021 compared to \$24.2 million in the three months ended December 31, 2020. This was the result of strong growth in OTC contract volumes and the average rate per contract of 54% and 27%, respectively in the three months ended December 31, 2021. This growth was principally driven by increased volatility in energy and renewable fuels markets.

Operating revenue derived from securities transactions declined \$3.9 million, or 3%, to \$122.7 million in the three months ended December 31, 2021 compared to \$126.6 million in the three months ended December 31, 2020. This decline was principally due to a 26% decline in RPM as the prior year period benefited from wider spreads due to volatility driven by the ongoing COVID-19 pandemic and was partially offset by a 25% increase in ADV.

Operating revenues derived from FX/CFD contracts increased \$12.4 million, or 21% to \$72.2 million in the three months ended December 31, 2021 compared to \$59.8 million in the three months ended December 31, 2020, principally as a result of a \$12.1 million increase in operating revenues derived from retail FX/CFD in our Retail segment.

Operating revenues from global payments increased \$7.7 million, or 23%, to a record \$41.3 million in the three months ended December 31, 2021 compared to \$33.6 million in the three months ended December 31, 2020, principally driven by a 15% increase in ADV and a 7% increase in global payments RPM.

Operating revenues derived from physical contracts increased \$17.1 million, or 72%, to \$40.9 million in the three months ended December 31, 2021 compared to \$23.8 million in the three months ended December 31, 2020. This increase was principally due to a \$14.1 million increase in physical agricultural and energy related commodity revenues, most notably in renewable fuels markets.

Interest and fee income earned on client balances, which is associated with our listed and OTC derivatives, correspondent clearing and independent wealth management product offerings, increased \$3.0 million, or 57%, to \$8.3 million in the three months ended December 31, 2021 compared to \$5.3 million in the three months ended December 31, 2020. This was principally driven by an increase in average client equity and average FDIC sweep client balances of 36% and 19%, respectively.

Operating revenues for the three months ended December 31, 2020 included a \$3.7 million unrealized loss on derivative positions used to mitigate our exposure to the British Pound in the acquired Gain subsidiaries in advance of the March 1, 2021 transfer of the majority of the operations of Gain's U.K. domiciled subsidiaries into StoneX Financial Ltd., a U.S. dollar denominated entity. In addition, as the Gain U.K. subsidiaries had a functional currency of British Pound, the increased U.S. dollar exposure resulted in a \$2.7 million foreign currency loss on revaluation for the three months ended December 31, 2020. Each of these items were reflected in operating revenues in the Corporate Unallocated segment.

Impact of the Gain on Acquisitions

The Company acquired Gain Capital Holdings, Inc., effective August 1, 2020. When evaluating the acquisition of Gain, management also considers the amortization expense related to the intangible assets identified and recorded as part of the acquisition and the net loss on the internal merger of the operations of Gain's U.K. subsidiaries.

The following table presents income before tax, income tax expense, and net income as reported in conformity with accounting principles generally accepted in the United States of America ("GAAP"). The following table also presents adjusted income before tax, adjusted income tax expense, and adjusted net income, which are non-GAAP financial measures. The "adjusted" non-GAAP financial measures reflect each item after removing the impact of the related transaction costs and other expenses for the three months ended December 31, 2021 and 2020, respectively. Management believes that presenting our results excluding the transaction costs and other expenses is meaningful, as it increases the comparability of period-to-period results.

(1) For the three months ended December 31, 2020, operating revenues include a \$3.7 million unrealized loss on derivative positions used to mitigate our exposure to the British Pound in the acquired Gain subsidiaries in advance of the March 1, 2021 transfer of the majority of the operations of Gain's U.K. domiciled subsidiaries into StoneX Financial Ltd., a U.S. dollar denominated entity. In addition, as the Gain's U.K. subsidiaries had a functional currency of British Pound, the increased U.S. dollar exposure resulted in a \$2.7 million foreign currency loss on revaluation for the three months ended December 31, 2020.
