May 4, 2016

## INTL FCStone Inc. Reports Fiscal 2016 Second Quarter Financial Results

## Net Income up 12\% to $\$ 14.5$ million

## Annualized Return on Equity of 14.3\% for quarter and 11.6\% year to date

NEW YORK, May 04, 2016 (GLOBE NEWSWIRE) -- INTL FCStone Inc. (the 'Company') (NASDAQ:INTL), a diversified global financial services organization delivering financial products, advisory and execution services, today announced its financial results for the fiscal year 2016 second quarter ended March 31, 2016.

Sean M. O'Connor, CEO of INTL FCStone Inc., stated "Our diversified business generated solid core operating results for the quarter which stands in strong contrast to the industry overall. A strong performance from our Securities segment was offset by a weaker performance in our Commercial Hedging segment. We saw a reversal of the immediately preceding quarter's marked-to-market losses on investments held in our interest rate management program. For the six months to date we achieved an ROE of almost $12 \%$, which we believe is a best in class performance, but still below our long term target of 15\%."

## INTL FCStone Inc. Summary Financials

Consolidated financial statements for the Company will be included in our Quarterly Report on Form 10-Q to be filed with the SEC. The Quarterly Report on Form 10-Q will also be made available on the Company's website at www.intlfcstone.com.

## Interest Income/Expense:

Overall interest income increased $\$ 9.5$ million to $\$ 18.5$ million in the second quarter, with our domestic fixed income institutional business increasing interest income $\$ 3.8$ million over the prior year. The acquisition of G.X. Clarke \& Co. on January 1, 2015 added the fixed income institutional business, and resulted in a significant change to our historical aggregate level of interest income and to a lesser extent interest expense.

Historically, our interest income has primarily been driven by the average customer equity in our Commercial Hedging and CES segments, as well as short term interest rates. Interest income in our Commercial Hedging and CES segments increased $\$ 0.8$ million in the second quarter, despite the interest income impact of average customer equity decreasing $4 \%$ versus the prior year period.

Corporately, we recorded pre-tax unrealized gains of $\$ 4.6$ million and $\$ 2.3$ million on our U.S. Treasury notes and interest rate swaps, respectively, held as part of the continued implementation of our interest rate management program, which includes the purchase of medium term U.S. Treasury notes and the utilization of interest rate swaps. Under this program, we don't actively trade in such instruments and intend to hold these investments to their maturity date, however as a brokerdealer, unrealized fluctuations in the marked-to-market ("MTM") valuations of these investments are included in operating revenues in the current period. The table below reflects the after-tax impact on net income of these MTM fluctuations for the last 5 fiscal quarters.

| MTM gain (loss) |  | 4.6 |  | (4.0) |  | 1.3 |  | - |  | - |
| Gross MTM gain (loss) |  | 6.9 |  | (6.7) |  | 6.9 |  | 0.1 |  | - |
| Tax effect (estimated at 39\%) |  | (2.7) |  | 2.6 |  | (2.7) |  | - |  | - |
| After tax MTM gain (loss) on above | \$ | 4.2 | \$ | (4.1) | \$ | 4.2 | \$ | 0.1 | \$ | - |

> (1) On July 1,2015 as part of our previously disclosed merger of four of our wholly owned U.S. subsidiaries, we transferred our remaining available-for-sale investments in U.S. Treasury securities, at fair value, to the trading category in accordance with the accounting requirements for broker-dealers. This resulted in $\$ 3.5$ million of pre-tax unrealized gains not previously recognized in earnings being included in interest income in our Corporate unallocated segment during the fourth quarter of fiscal 2015 .

Interest expense increased $58 \%$ to $\$ 7.1$ million in the second quarter compared to $\$ 4.5$ million in the prior year. The increase in interest expense is primarily related to $\$ 1.9$ million of higher expense from the fixed income institutional business acquired.

## Non-interest Expenses and Key Operating Metrics:

The following table reflects a breakout of total non-interest expenses by variable and non-variable components, which is used by management in evaluating our non-interest expenses, for the periods indicated.

## Commercial Hedging

In our Commercial Hedging segment we provide risk management consulting services in which we assist our customers in the execution of their hedging strategies through a wide range of products from listed exchange-traded futures and options on futures contracts, to basic over-the-counter ("OTC") instruments that offer greater flexibility and structured OTC products designed for customized solutions. These services span virtually all traded commodity markets, with the largest concentrations in agricultural and energy commodities (consisting primarily of grains, energy and renewable fuels, coffee, sugar, cotton, and food service) and base metals products listed on the LME.

Operating revenues decreased $15 \%$ to $\$ 54.7$ million in the second quarter compared to $\$ 64.7$ million in the prior year. Exchange-traded revenues increased $7 \%$, to $\$ 32.4$ million in the second quarter, resulting primarily from strong growth in agricultural commodity revenues, particularly in the domestic grain markets as well as growth in our London operations. Overall exchange-traded contract volume increased $18 \%$ and the average rate per contract decreased $10 \%$ to $\$ 5.62$.

OTC revenues decreased $42 \%$, to $\$ 16.8$ million in the second quarter, primarily driven by lower customer volumes in Latin and South America as well the effect of low energy prices and volatility which drove a decline in energy and renewable fuels OTC revenues. Overall OTC volumes decreased $33 \%$, particularly in agricultural commodities, while the average rate per contract declined $14 \%$ compared to the prior year.

Consulting and management fees declined $\$ 0.4$ million to $\$ 3.4$ million versus the prior year, while interest income, which remains constrained by low short-term interest rates, increased $\$ 0.4$ million, or $24 \%$, to $\$ 2.1$ million compared to the prior year. The increase in interest income is primarily driven by the continued implementation of our interest rate management program, an increase in short-term rates, as well as a 6\% increase in average customer equity.

Segment income decreased to $\$ 13.8$ million in the second quarter compared to $\$ 21.7$ million in the prior year, primarily as a result of the decrease in OTC revenues. Variable expenses, excluding interest, expressed as a percentage of operating revenues increased to $44 \%$ compared to $39 \%$ in the prior year, primarily as the result of an increase in transaction-based clearing expenses and variable compensation.

## Global Payments

Our Global Payments segment provides global payment solutions to banks and commercial businesses as well as charities, non-governmental organizations ("NGOs") and government organizations.

Operating revenues decreased $5 \%$ to $\$ 17.4$ million in the second quarter compared to $\$ 18.4$ million in the prior year. This decline in operating revenues was primarily driven by a narrowing of spreads in the foreign exchange markets, which drove a $17 \%$ decrease in the average revenue per trade. The volume of payments made increased $14 \%$ as we continued to benefit from an increase in financial institutions and other customers utilizing our electronic transaction order system.

Segment income decreased $6 \%$ to $\$ 9.3$ million in the second quarter compared to $\$ 9.9$ million in the prior year. This decrease primarily resulted from the decrease in operating revenues during the second quarter as well as slight increase in non-variable trade system expenses. Variable expenses, excluding interest, expressed as a percentage of operating revenues decreased to $29 \%$ compared to $30 \%$ in the prior year.

## Securities

In our Securities segment we provide value-added solutions that facilitate cross border trading in the equity markets as well as provide a full range of corporate finance advisory services to our middle market clients, including capital market solutions and a wide range of advisory services across a broad spectrum of industries. Following our acquisition of G.X. Clarke \& Co., we act as an institutional dealer in fixed income securities, including U.S. Treasuries, Federal Agency and Mortgage-Backed Securities to a client base including asset managers, commercial bank trust and investment departments, broker-dealers, and insurance companies. In addition, we also originate, structure and place a wide array of debt instruments in the international capital markets as well as operate an asset management business in Argentina.

Operating revenues increased $26 \%$ to $\$ 45.6$ million in the second quarter compared to $\$ 36.1$ million in the prior year.
Operating revenues in our Securities segment are comprised of activities in four product lines, equity market-making, debt trading, investment banking and asset management. Operating revenues in equity market-making increased $27 \%$ to $\$ 19.5$ million in the second quarter compared to the prior year, despite a $3 \%$ decrease in the gross dollar volume traded, as spreads widened driving a $32 \%$ increase in the average revenue per $\$ 1,000$ traded. Equity market-making operating revenues include the trading profits we earn before the related expense deduction for American Depositary Receipts ("ADR") conversion fees. These ADR fees are included in the consolidated income statements as 'transaction-based clearing expenses'.

Operating revenues in debt trading increased $22 \%$ to $\$ 19.8$ million in the second quarter compared to the prior year, primarily as a result of continued growth in our domestic institutional fixed income business as well as improved performance in our Argentina operations in the second quarter. The operating revenues in investment banking increased $45 \%$ to $\$ 1.6$ million compared to the prior year. Asset management operating revenues increased $34 \%$ to $\$ 4.7$ million in the second quarter primarily related to an increase in fair value of investments, despite an $8 \%$ decrease in average assets under management to $\$ 515.4$ million in the second quarter compared to $\$ 562.5$ million in the prior year, which were impacted by the devaluation of the Argentine peso.

Segment income increased $49 \%$ to $\$ 18.2$ million in the second quarter compared to $\$ 12.2$ million in the prior year, primarily as a result of the increases in equity market-making and debt trading operating revenues. Variable expenses, excluding interest, expressed as a percentage of operating revenues decreased to $37 \%$ in the second quarter compared to $39 \%$ in the prior year.

## Physical Commodities

In our Physical Commodities segment we provide a full range of trading and hedging capabilities, including OTC products, to select producers, consumers and investors in precious metals, provide financing to commercial commodity-related companies against physical inventories, including grain, lumber, meats, energy products and renewable fuels and act as a principal to facilitate inputs to the renewable fuels and feed ingredient industries.

Operating revenues for Physical Commodities increased $23 \%$ to $\$ 7.9$ million in the second quarter compared to $\$ 6.4$ million in the prior year.

Precious Metals operating revenues increased $28 \%$ to $\$ 5.0$ million in the second quarter compared to $\$ 3.9$ million in the prior year. Operating revenues increased from the prior year period, despite a $43 \%$ decline in the number of ounces traded as spreads widened in this business driving a $130 \%$ increase in the average revenue per ounce traded.

Operating revenues in Physical Ag's \& Energy increased 16\% to \$2.9 million in the second quarter compared to the prior year. The increase in operating revenues is primarily due to an increase in our customer volumes in the feed ingredient industry.

Segment income decreased $21 \%$ to $\$ 1.9$ million in the second quarter compared to $\$ 2.4$ million in the prior year, primarily as a result of a $\$ 1.3$ million increase in bad debt expense in Physical Ag's \& Energy, related to customers in the renewal fuels industry.

## Clearing and Execution Services

Our Clearing and Execution Services (CES) segment provides competitive and efficient clearing and execution of exchangetraded futures and options on futures contracts for the institutional and professional trader market segments and provides prime brokerage foreign exchange services to financial institutions and professional traders.

Operating revenues increased $6 \%$ to $\$ 33.3$ million in the second quarter compared to $\$ 31.5$ million in the prior year. Operating revenues are primarily generated from three sources: commission and clearing fee revenues from the execution and clearing of exchange-traded futures and options on futures contracts, trading gains, net, which primarily represents the spread retained in OTC foreign exchange customer prime brokerage activities, and interest income derived from cash balances in our customers' accounts.

Commission and clearing fee revenues increased $3 \%$ to $\$ 25.9$ million in the second quarter compared to $\$ 25.2$ million in the prior year despite a $2 \%$ decline in exchange-traded volumes as the average rate per contract increased $4 \%$ compared to the prior year period as a result of business mix. Interest income increased $44 \%$ to $\$ 1.3$ million in the second quarter primarily as a result of the continued implementation of our interest rate management program and an increase in shortterm rates. This was partially offset by a $12 \%$ decrease in average customer equity to $\$ 941.9$ million.

Operating revenues in our customer prime brokerage product line, reflected on the "trading gains, net" line increased 14\% to $\$ 5.7$ million in the second quarter compared to $\$ 5.0$ million in the prior year, as a result of a $43 \%$ increase in foreign exchange volumes driven by higher market volatility.

Segment income increased to $\$ 3.5$ million in the second quarter compared to $\$ 2.9$ million in the prior year, primarily as a result of the increase in operating revenues and a decline in variable expenses as a percentage of operating revenues. Variable expenses, excluding interest, as a percentage of operating revenues were $74 \%$ in the second quarter compared to $76 \%$ in the prior year.

## Conference Call \& Web Cast
