Forward-Looking Statements

The following presentation should be taken in conjunction with the most recent financial statements and notes thereto as well as the most recent Annual Report on Form 10-K, subsequent Quarterly Reports on Form 10-Q and other reports filed with the SEC by StoneX Group Inc. (the "Company"). This presentation may contain "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. These forward-looking statements involve known and unknown risks and uncertainties, many of which are beyond the Company's control, including adverse changes in economic, political and market conditions (including the uncertain impacts of COVID-19), losses from the Company's market-making and trading activities arising from counter-party failures and changes in market conditions, the possible loss of key personnel, the impact of increasing competition, the impact of changes in government regulation, the possibility of liabilities arising from violations of federal and state securities laws and the impact of changes in technology in the securities, foreign exchange and commodities dealing and trading industries. Although the Company believes that its forward-looking statements are based upon reasonable assumptions regarding its business and future market conditions, there can be no assurances that the Company's actual results will not differ materially from any results expressed or implied by the Company's forward-looking statements. The Company undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by law. Readers are cautioned that any forward-looking statements are not guarantees of future performance.

Non-GAAP Financial Measures

The following presentation includes non-GAAP financial measures, including Adjusted Net Income. Non-GAAP financial measures have certain limitations, including that they do not have a standardized meaning and, therefore, may be different from similar non-GAAP financial measures used by other companies and/or analysts. The Company believes its reporting of select non-GAAP financial measures assists investors in evaluating its historical and expected operating performance. However, because these are not measures of financial performance calculated in accordance with GAAP, such measures should be considered in addition to, but not as a substitute for, other measures of the Company's financial performance reported in accordance with GAAP, such as Net Income. See the Appendix for a reconciliation of the Company's Adjusted Net Income to the most directly comparable GAAP measure.
