⁽³⁾ The ADV for the three months and year ended September 30, 2020 was reflective of the ADV of post-acquisition of Gain, and is calculated based on 43 trading days with the activities of Gain, acquired effective August 1, 2020. FX/CFD Contracts ADV from Gain is included in our Retail segment and our pre-existing FX activities, which are shown in our Institutional segment, had 260 trading days during the year ended September 30, 2020.

Operating Revenues

Operating revenues increased \$48.0 million, or 14%, to \$390.1 million in the three months ended September 30, 2021 compared to \$342.1 million in the three months ended September 30, 2020. The table above displays operating revenues disaggregated across the key products we provide to our clients.

Operating revenues derived from listed derivatives increased \$7.1 million, or 9%, to \$89.7 million in the three months ended September 30, 2021 compared to \$82.6 million in the three months ended September 30, 2020. This growth was primarily driven by an 8% increase in the average rate per contract, principally due to an increase in volume from commercial customers, with an overall increase of 2% in listed derivative contract volumes.

Operating revenues derived from OTC transactions increased \$11.8 million, or 52%, to \$34.4 million in the three months ended September 30, 2021 compared to \$22.6 million in the three months ended September 30, 2020. This was the result of growth in OTC contract volumes and the average rate per contract of 40% and 8%, respectively in the three months ended September 30, 2021. This growth was principally driven by increased volatility in both agricultural and energy markets.

Operating revenue derived from securities transactions increased \$11.3 million, or 11%, to \$112.1 million in the three months ended September 30, 2021 compared to \$100.8 million in the three months ended September 30, 2020. This growth was principally due to an 81% increase in ADV, which was partially offset by a 41% decline in the RPM as the prior year period benefited from wider spreads due to higher relative volatility driven in part by the COVID-19 pandemic.

Operating revenues derived from FX/CFD contracts increased \$7.1 million, or 15% to \$55.7 million in the three months ended September 30, 2021 compared to \$48.6 million in the three months ended September 30, 2020, as a result of an incremental \$8.9 million in FX/CFD contracts operating revenues in our Retail segment resulting from the acquisition of Gain, effective August 1, 2020, which was partially offset by lower FX operating revenues in our Institutional FX prime brokerage business.

Operating revenues from global payments increased \$4.9 million, or 17%, to \$33.3 million in the three months ended September 30, 2021 compared to \$28.4 million in the three months ended September 30, 2020, principally driven by the net impact of a 29% increase in ADV and a 9% decline in RPM.

Operating revenues derived from physical contracts increased \$2.9 million, or 7%, to \$42.1 million in the three months ended September 30, 2021 compared to \$39.2 million in the three months ended September 30, 2020. This increase was principally due to increases in agricultural and energy commodity and retail precious metals revenues, partially offset by the decline in commercial precious metals operating revenues. Operating revenues during the three months ended September 30, 2021 and 2020 include gains related to physical inventories, previously carried at the lower of cost or net realizable value, of \$0.3 million and \$3.0 million, respectively.

Interest and fee income earned on client balances, which is associated with our listed and OTC derivative, correspondent clearing, and independent wealth management product offerings, increased \$3.1 million, or 65%, to \$7.9 million in the three months ended September 30, 2021 compared to \$4.8 million in the three months ended September 30, 2020. This was principally driven by an increase in average client equity and average FDIC sweep client balances of 25% and 21%, respectively.

Impact of the Gain on Acquisitions

The Company acquired Gain, effective August 1, 2020. The results of the three months ended September 30, 2020 included a gain of \$81.8 million related to the acquisition. The results of the three months ended June 30, 2021 include a gain of \$3.3 million related to the acquisition, due to an adjustment to the final liabilities assumed, resulting in an adjustment from the initially determined values as of August 1, 2020.

These gains on the acquisition are non-taxable, and accordingly there is no corresponding income tax provision amount recorded related to these gains. When evaluating the acquisition of Gain, along with the gains on acquisition recorded, management also considers the amortization expense related to the intangible assets identified and recorded as part of the gain, the net loss on the internal merger of the operations of Gain's U.K. subsidiaries, acquisition related investment banking, legal, and financing fees incurred in fiscal 2020, and an impairment charge related to capitalized software not yet placed into service, which was determined to be replaced with a system acquired as part of the Gain transaction.

The following table presents income before tax, income tax (benefit) expense, and net income as reported in conformity with accounting principles generally accepted in the United States of America (“GAAP”). The following table also presents adjusted income before tax, adjusted income tax (benefit) expense, and adjusted net income, which are non-GAAP measures. The “adjusted” non-GAAP measures reflect each item after removing the impact of the gains on acquisitions and related transaction costs and other expenses for the three months and fiscal years ended September 30, 2021 and 2020, respectively. Management believes that presenting our results excluding the gains on acquisitions and related transaction costs and other expenses is meaningful, as it increases the comparability of period-to-period results.
