INTERNATIONAL ASSETS HOLDING CORPORATION

Notes to Condensed Consolidated Financial Statements
(Unaudited)

Note 1 – Basis of Presentation and Consolidation and Recent Accounting Pronouncements

International Assets Holding Corporation and its subsidiaries (collectively “INTL” or “the Company”) form a financial services group focused on select international markets. We commit our capital and expertise to market-making and dealing in financial instruments, currencies and commodities, and to asset management. The Company’s activities are divided into five functional areas; international equities market-making, international debt capital markets, foreign exchange trading, commodities trading and asset management.

Basis of Presentation and Consolidation

The accompanying condensed consolidated balance sheet as of September 30, 2008, which has been derived from audited financial statements, and the unaudited interim condensed consolidated financial statements have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and note disclosures normally included in annual financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted pursuant to those rules and regulations. The Company believes that the disclosures made are adequate to make the information not misleading. All adjustments that, in the opinion of management and consisting only of a normal and recurring nature, are necessary for a fair presentation for the interim periods presented have been reflected as required by Regulation S-X, Rule 10-01.

Operating results for interim periods are not necessarily indicative of the results that may be expected for the full year. It is suggested that these financial statements should be read in conjunction with the Company’s consolidated financial statements and related notes contained in the Company’s latest shareholders’ annual report and Form 10-K for the fiscal year ended September 30, 2008 as filed with the Securities and Exchange Commission.

These financial statements include the accounts of International Assets Holding Corporation and its subsidiaries. Intercompany transactions and balances have been eliminated in consolidation. Equity investments in which we exercise control or variable interest entities in which we are the primary beneficiary have been consolidated. Our fiscal year end is September 30, and our fiscal quarters end on December 31, March 31 and June 30. Unless otherwise stated, all dates refer to our fiscal years and fiscal periods.

Recent Accounting Pronouncements

Recently Adopted Accounting Pronouncements

The Company adopted Statement of Financial Accounting Standard (“SFAS”) No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities—Including an amendment of FASB Statement No. 115* with effect from October 1, 2008, the beginning of the 2009 fiscal year. The Company has not applied the fair value option to any additional categories of financial assets or liabilities as a result of the adoption of SFAS No. 159. The categories of financial assets and financial liabilities reported at fair value in the Company’s condensed consolidated balance sheets under “Financial instruments owned, at fair value”, “Financial instruments sold, not yet purchased, at fair value” and “Investments in managed funds, at fair value” at December 31, 2008 remain consistent with those reported under the same headings at September 30, 2008.

The Company adopted SFAS No. 157, *Fair Value Measurements*, with effect from October 1, 2008, the beginning of the 2009 fiscal year. The provisions of SFAS No. 157 are to be applied prospectively, with certain exceptions that do not apply to financial instruments held by the Company at September 30, 2008. Accordingly, there are no cumulative effect adjustments to be made to opening balances of retained earnings. SFAS No. 157 establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). Note 5 below gives the information required by SFAS No. 157 relating to the Company’s financial assets and liabilities that are carried at fair value.

In October 2008, the Financial Accounting Standards Board (“FASB”) issued FASB Staff Position (“FSP”) FAS 157-3, *Determining the Fair Value of a Financial Asset When the Market for that Asset is not Active*. FSP FAS 157-3 is consistent with the joint press release the FASB issued with the Securities and Exchange Commission on September 30, 2008, which provides general clarification guidance on determining fair value under SFAS No. 157 when markets are inactive. FSP FAS 157-3 specifically addresses the use of judgment in determining whether a transaction in a dislocated market represents fair value, the inclusion of market participant risk

[Table of Contents](#)

adjustments when an entity significantly adjusts observable market data based on unobservable inputs, and the degree of reliance to be placed on broker quotes or pricing services. FSP FAS 157-3 was effective October 10, 2008. FSP FAS 157-3 has not had a significant effect on our current fair value measurements.

In September 2008, the FASB issued FSP FAS 133-1 and FASB Interpretation No. (“FIN”) 45-4, *Disclosures about Credit Derivatives and Certain Guarantees: An Amendment of FASB Statement No. 133 and FASB Interpretation No. 45*; and *Clarification of the Effective Date of FASB Statement No. 161*. FSP FAS 133-1 and FIN 45-4 require enhanced disclosures by sellers of credit derivatives, including credit derivatives embedded in a hybrid instrument, and require additional disclosure about the current status of the payment/performance risk of a guarantee. FSP FAS 133-1 and FIN 45-4 are effective for our financial statements for the fiscal quarter ended December 31, 2008. The adoption of FSP FAS 133-1 and FIN 45-4 has had no effect on disclosures in our financial statements.

On December 11, 2008, the FASB issued FSP No. FAS 140-4 and FIN 46(R)-8, which amends SFAS No. 140, *Accounting for Transfer and Servicing of Financial Assets and Extinguishment of Liabilities*, to require public entities to provide additional disclosures about transfers of financial assets. It also amends FIN 46(R), *Consolidation of Variable Interest Entities*, to require public enterprises to provide additional disclosures about their involvement with variable interest entities. This FSP is effective for the first reporting period, interim or annual, ending after December 15, 2008, which for the Company means the quarter ended December 31, 2008. This FSP has had no effect on disclosures in our financial statements.

On January 12, 2009, the FASB issued FSP No. EITF 99-20-1, *Amendments to the Impairment Guidance of EITF Issue No. 99-20*. This FSP amends the impairment guidance in EITF 99-20, *Recognition of Interest Income and Impairment on Purchased Beneficial Interests and Beneficial Interests that Continue to be Held by a Transferor in Securitized Financial Assets*, to achieve more consistent determination of whether an other-than-temporary impairment has occurred. The FSP also retains and emphasizes the objective of an other-than-temporary impairment assessment and the related disclosure requirements in SFAS No. 115, *Accounting for Certain Investments in Debt and Equity Securities, and other related guidance*. This FSP is effective for the first reporting period, interim or annual, ending after December 15, 2008, which for the Company means the quarter ended December 31, 2008. This FSP has had no effect on disclosures in our financial statements.

Recent Accounting Pronouncements Not Yet Adopted

FASB’s Emerging Issues Task Force (“EITF”) has reached consensus on EITF Issue No. 08-5, *Issuer’s Accounting for Liabilities Measured at Fair Value with a Third-Party Credit Enhancement*. The objective of EITF 08-5 is to determine an issuer’s unit of accounting for a liability issued with an inseparable third-party credit enhancement when it is measured or disclosed at fair value on a recurring basis. EITF 08-5 is effective on a prospective basis in the first reporting period beginning on or after December 15, 2008 which for the Company will be the fiscal quarter ending March 31, 2009. This pronouncement is not expected to have any effect on disclosures in our financial statements.

The EITF has reached consensus on EITF Issue No. 07-5, *Determining Whether an Instrument (or Embedded Feature) is Indexed to an Entity’s Own Stock*. The objective of EITF 07-5 is to provide guidance for determining whether an equity-linked financial instrument (or embedded feature) is indexed to an entity’s own stock. EITF 07-5 is effective for financial statements issued for fiscal years beginning after December 15, 2008, and interim periods within those fiscal years, which for the Company means the 2010 fiscal year, beginning on October 1, 2009. We are currently evaluating the effect that the adoption of EITF 07-5 will have on disclosures in our financial statements.

Note 2 – Reclassifications and Change in Accounting Policy

Effective for the fiscal quarter ended June 30, 2008, the Company reclassified certain prior period balances from professional fees to clearing and related expenses. The reclassified fees were fund service accounting charges which are based on the value of the respective fund. The net result of this change for the fiscal quarter ended December 31, 2007 was an increase in clearing and related expenses of \$0.1 million and a corresponding decrease in professional fees.

[Table of Contents](#)**Note 3 – Earnings per Share**

Basic earnings per share has been computed by dividing net income by the weighted average number of common shares outstanding. The following is a reconciliation of the numerator and denominator of the diluted net income per share computations for the periods presented below.

(In millions, except share amounts)	Three Months Ended December 31,	
	2008	2007
Numerator:		
Income from continuing operations	\$ 3.3	\$ 13.1
Add: Interest on convertible debt, net of tax	0.3	0.4
Diluted income from continuing operations	3.6	13.5
Less: loss from discontinued operations	—	(0.2)
Diluted net income	<u>\$ 3.6</u>	<u>\$ 13.3</u>
Denominator:		
Weighted average number of:		
Common shares outstanding	8,853,976	8,289,477
Dilutive potential common shares outstanding:		
Share-based awards	441,398	586,365
Convertible debt	657,078	981,547
Diluted weighted-average shares	<u>9,952,452</u>	<u>9,857,389</u>

The dilutive effect of share-based awards is reflected in diluted net income per share by application of the treasury stock method, which includes consideration of unamortized share-based compensation expense required by SFAS No. 123 (R). The dilutive effect of convertible debt has been reflected in diluted net income per share by application of the if-converted method.

Options to purchase 566,603 and 81,380 shares of common stock for the three months ended December 31, 2008 and 2007, respectively, were excluded from the calculation of diluted earnings per share because they would have been anti-dilutive.

Note 4 – Other Revenues, net

Other revenue is comprised of the following:

(In millions)	Three Months Ended December 31,	
	2008	2007
Fees and commissions	\$ 1.9	\$ 1.3
Dividend income (expense), net	0.1	(0.1)
Interest income	0.8	0.4
Other	0.3	0.3
Total other revenues, net	<u>\$ 3.1</u>	<u>\$ 1.9</u>

Note 5 – Financial Assets and Financial Liabilities, at Fair Value

The Company adopted SFAS No. 159 and SFAS No. 157 with effect from October 1, 2008. See Note 1 above for further information in this regard. The Company's financial assets and liabilities that are carried at fair value are:

- Financial instruments owned
- Financial instruments sold, not yet purchased
- Investments in managed funds

Table of Contents

The table below sets forth an analysis of financial instruments owned and financial instruments sold, not yet purchased. This is followed by tables that provide the information required by SFAS No. 157 on all financial assets and liabilities that are carried at fair value.

(In millions)	December 31, 2008		September 30, 2008	
	Owned	Sold, not yet purchased	Owned	Sold, not yet purchased
Common stock and ADR's	\$ 16.8	\$ 5.5	\$ 18.3	\$ 5.8
Exchangeable foreign ordinary equities and ADR's	20.0	20.2	35.0	35.1
Corporate and municipal bonds	48.7	—	80.2	—
U.S. and foreign government obligations	1.5	17.9	1.3	44.6
Derivatives	12.0	23.9	31.5	13.3
Commodities	67.0	14.0	49.9	52.7
Mutual funds and other	0.8	—	1.8	—
	<u>\$166.8</u>	<u>\$ 81.5</u>	<u>\$218.0</u>	<u>\$ 151.5</u>

Fair Value Hierarchy

The following table sets forth the Company's financial assets and liabilities that were accounted for at fair value as of December 31, 2008 by level within the fair value hierarchy. As required by SFAS No. 157, financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. The three levels of the fair value hierarchy under SFAS No. 157 are:

Level 1: unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;

Level 2: quoted prices in markets that are not active, or inputs that are observable, either directly or indirectly, for substantially the full term of the asset or liability; and

Level 3: prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (i.e., supported by little or no market activity).

(In millions)	December 31, 2008				
	Level 1	Level 2	Level 3	Netting and Collateral	Total
Assets:					
Common stock and ADR's	\$ 26.9	\$ 8.1	\$ 1.8	\$ —	\$ 36.8
Corporate and municipal bonds	40.9	2.3	5.5	—	48.7
U.S. and foreign government obligations	1.3	0.2	—	—	1.5
Derivatives	4.3	7.7	—	—	12.0
Commodities	—	265.7	—	(198.7)	67.0
Mutual funds and other	0.8	—	—	—	0.8
Investment in managed funds	—	—	12.5	—	12.5
Total assets at fair value	<u>\$ 74.2</u>	<u>\$ 284.0</u>	<u>\$ 19.8</u>	<u>\$ (198.7)</u>	<u>\$ 179.3</u>
Liabilities:					
Common stock and ADR's	\$ 23.9	\$ 1.8	\$ —	\$ —	\$ 25.7
Corporate and municipal bonds	—	—	—	—	—
U.S. and foreign government obligations	17.9	—	—	—	17.9
Derivatives	8.8	15.1	—	—	23.9
Commodities	—	22.6	—	(8.6)	14.0
Mutual funds and other	—	—	—	—	—
Total liabilities at fair value	<u>\$ 50.6</u>	<u>\$ 39.5</u>	<u>\$ —</u>	<u>\$ (8.6)</u>	<u>\$ 81.5</u>

[Table of Contents](#)

Information on Level 3 Financial Assets and Liabilities

The Company's financial assets at fair value classified within level 3 of the fair value hierarchy are as follows:

(In millions)	As of December 31, 2008
Total level 3 assets	19.8
Level 3 assets for which the company bears economic exposure	19.8
Total assets	372.5
Total financial assets at fair value	179.3
Total level 3 assets as a percentage of total assets	5.3%
Total level 3 assets as a percentage of total financial assets at fair value	11.0%

The following table sets forth a summary of changes in the fair value of the Company's level 3 financial assets and liabilities during the fiscal quarter ended December 31, 2008 including a summary of unrealized gains (losses) during the quarter on the Company's level 3 financial assets and liabilities still held at December 31, 2008.

(In millions)	Level 3 Financial Assets and Financial Liabilities For the Three Months Ended December 31, 2008					
	Balances at prior reporting date	Realized gains/losses during period	Unrealized gains/losses at reporting date	Purchases, issuances, settlements	Transfers in or out of Level 3	Balances at current reporting date
Assets:						
Common stock and ADR's	\$ 2.9	\$ —	\$ (1.1)	\$ —	\$ —	\$ 1.8
Corporate and municipal bonds	4.1	0.1	1.2	0.1	—	5.5
Investment in managed funds	11.9	—	0.1	0.5	—	12.5
	<u>\$ 18.9</u>	<u>\$ 0.1</u>	<u>\$ 0.2</u>	<u>\$ 0.6</u>	<u>\$ —</u>	<u>\$ 19.8</u>

Note 6 – Financial Instruments with Off-Balance Sheet Risk and Concentrations of Credit Risk

The Company is party to certain financial instruments with off-balance sheet risk in the normal course of its business. The Company has sold financial instruments that it does not currently own and will therefore be obliged to purchase such financial instruments at a future date. The Company has recorded these obligations in the condensed consolidated financial statements at December 31, 2008 at the fair values of the related financial instruments. The Company will incur losses if the market value of the financial instruments increases subsequent to December 31, 2008. The total of \$81.5 million at December 31, 2008 includes \$23.9 million for derivative contracts, which represent a liability to the Company based on their fair values as of December 31, 2008.

Listed below are the fair values of trading-related derivatives as of December 31, 2008 and September 30, 2008. Assets represent net unrealized gains and liabilities represent net unrealized losses.

(In millions)	December 31, 2008		September 30, 2008	
	Assets	Liabilities	Assets	Liabilities
Equity index derivatives	\$ 1.0	\$ 0.1	\$ 1.8	\$ 0.2
Foreign exchange derivatives	0.1	—	—	—
Interest rate derivatives	—	5.7	—	0.5
Commodity price derivatives	10.9	18.1	29.7	12.6
	<u>\$12.0</u>	<u>\$ 23.9</u>	<u>\$31.5</u>	<u>\$ 13.3</u>

Commodity price derivatives	10.9	10.9	—	—	18.1	18.1	—	—
	<u>\$12.0</u>	<u>\$ 11.0</u>	<u>\$ 0.4</u>	<u>\$ 0.6</u>	<u>\$23.9</u>	<u>\$ 18.1</u>	<u>\$ —</u>	<u>\$ 5.8</u>
Commodity price derivatives:								
Base metals	\$ 4.3	\$ 4.3	\$ —	\$ —	\$ —	\$ —	\$ —	\$ —
Precious metals	\$ 6.6	\$ 6.6	\$ —	\$ —	\$18.1	\$ 18.1	\$ —	\$ —

The Company's derivative contracts are principally held in its commodities business segment. The Company assists its commodities customers in protecting the value of their future production by entering into option or forward agreements with them on an OTC basis. The Company also provides its commodities customers with sophisticated option products, including combinations of buying and selling puts and calls. The Company mitigates its risk by effecting offsetting OTC options with market counterparties or through the purchase or sale of exchange-traded commodities futures. The risk mitigation of offsetting options is not within the documented hedging designation requirements of SFAS No. 133.

These derivative contracts are traded along with cash transactions because of the integrated nature of the markets for such products. The Company manages the risks associated with derivatives on an aggregate basis along with the risks associated with its proprietary trading and market-making activities in cash instruments as part of its firm-wide risk management policies. In particular, the risks related to derivative positions may be partially offset by inventory, unrealized gains in inventory or cash collateral paid or received.

In the normal course of business, the Company purchases and sells financial instruments and foreign currencies as either principal or agent on behalf of its customers. If either the customer or counterparty fails to perform, the Company may be required to discharge the obligations of the nonperforming party. In such circumstances, the Company may sustain a loss if the market value of the financial instrument or foreign currency is different from the contract value of the transaction.

The majority of the Company's transactions and, consequently, the concentration of its credit exposure is with customers, broker-dealers and other financial institutions. These activities primarily involve collateralized and uncollateralized arrangements and may result in credit exposure in the event that a counterparty fails to meet its contractual obligations. The Company's exposure to credit risk can be directly impacted by volatile financial markets, which may impair the ability of counterparties to satisfy their contractual obligations. The Company seeks to control its credit risk through a variety of reporting and control procedures, including establishing credit limits based upon a review of the counterparties' financial condition and credit ratings. The Company monitors collateral levels on a daily basis for compliance with regulatory and internal guidelines and requests changes in collateral levels as appropriate.

Note 7 – Physical Commodities Inventory

Physical commodities inventory is valued at the lower of cost or market value, determined using the specific identification weighted average price method. Commodities in process include commodities in the process of being recycled. The carrying values of the Company's inventory at December 31, 2008 and September 30, 2008 are shown below.

(In millions)	December 31, 2008	September 30, 2008
Commodities in process	\$ 0.6	\$ 5.5
Finished commodities	41.4	51.9
	<u>\$ 42.0</u>	<u>\$ 57.4</u>

Note 8 – Goodwill

The Company acquired the Gainvest group of companies (“INTL Gainvest”), specialists in local markets securitization and asset management in Argentina, Brazil and Uruguay, in May 2007. Pursuant to this acquisition, the Company is obligated to make a further payment on June 1, 2009 equal to 25% of the aggregate revenues that INTL Gainvest earns during the 12 months ending April 30, 2009. The revenues on which the 25% is calculated are subject to a minimum threshold of \$5.5 million and a maximum ceiling of \$11 million for this period. As of December 31, 2008, the aggregate revenues of INTL Gainvest since May 1, 2008 had not exceeded the minimum threshold of \$5.5 million for the year ending April 30, 2009. An amount equal to 25% of INTL Gainvest’s revenues for the 12 months ending April 30, 2009 will be recorded as additional goodwill if and when the minimum revenue threshold is achieved.

Note 9 – Related Party Transactions

As of December 31, 2008, the Company had investments valued at \$15.7 million in two hedge funds managed by INTL Consilium, LLC (‘INTL Consilium’), including \$14.4 million in the INTL Consilium Convertible Arbitrage Fund (‘the ICCAF fund’). The Company owns a 50.1% interest in INTL Consilium. The Company also has an investment valued at \$11.1 million in the INTL Trade Finance Fund Limited, a fund managed by the Company’s wholly-owned subsidiary, INTL Capital Limited. This fund invests primarily in global trade finance-related assets. Under the provisions of FIN 46(R), the Company is required to consolidate the ICCAF fund as a variable interest entity. Accordingly, the minority interest shown in the condensed consolidated income statements also includes the minority interests in the ICCAF fund. The creditors of the ICCAF fund have no recourse on the general assets of the Company. The Company’s investments in unconsolidated hedge funds are included in ‘Investment in managed funds, at fair value’ on the condensed consolidated balance sheets.

Note 10 – Payable to Lenders under Loans and Overdrafts

As of December 31, 2008 the Company had four credit facilities under which the Company may borrow up to \$200 million, subject to certain conditions. Interest expense related to the Company’s credit facilities was approximately \$1.8 million and \$1.7 million for the three months ended December 31, 2008 and 2007, respectively.

The Company’s four credit facilities at December 31, 2008 consisted of the following:

- A one-year, renewable, revolving syndicated committed loan facility established on June 27, 2008 under which the Company’s wholly-owned subsidiary, INTL Commodities, Inc. (‘INTL Commodities’) is entitled to borrow up to \$125 million, subject to certain conditions. There are six commercial banks that are the underlying lenders within the syndicate group. The loan proceeds will be used to finance the activities of INTL Commodities and are secured by its assets. The interest rate for the facility depends on the ratio of borrowings to equity and ranges between 2.00% and 2.25% over the federal funds rate (0.16% at December 31, 2008) or over the LIBOR rate for the applicable term, at the Company’s election.
- A demand facility established on March 5, 2008, under which the Company’s Dubai joint venture, INTL Commodities DMCC, may borrow up to \$15 million, subject to certain conditions. The facility is secured by inventory and receivables and is guaranteed by the Company.
- Two additional lines of credit with a commercial bank under which the Company may borrow up to \$60 million, subject to certain conditions. One of these lines of credit is secured by certain of the Company’s assets. The other is secured by a pledge of shares held in certain of the Company’s foreign subsidiaries. The interest rate on these facilities was 2.40% over one-month LIBOR (approximately 1.75% at December 31, 2008).

[Table of Contents](#)

At December 31, 2008, the Company had the following credit facilities and outstanding borrowings:

<u>Security</u>	<u>Maturity Date</u>	<u>Maximum Amount</u>	<u>Amount Outstanding</u>
Certain foreign exchange assets	December 31, 2009	\$ 25.0	\$ 4.2
Certain pledged shares	December 31, 2009	35.0	25.2
Certain commodities assets	On demand	15.0	9.8
Certain commodities assets	June 27, 2009	125.0	65.0
		<u>\$ 200.0</u>	<u>\$ 104.2</u>

The Company has entered into two interest rate swap transactions totaling \$100 million at December 31, 2008, in order to hedge potential changes in cash flows resulting from our variable rate LIBOR based borrowings, that are classified under SFAS NO. 133 as cash flow hedges. The effective portion of the swap's gain or loss for the quarter ended December 31, 2008, as calculated using the long-haul method, was a loss of \$3.8 million, which has been reported in the balance sheet as a component of accumulated other comprehensive income (loss). This balance will be recognized in earnings over the remaining term of the swaps, as the hedged exposure affects interest expense. The ineffective portion of the swap gain or loss was a loss of \$1.1 million for the quarter ended December 31, 2008, which is included in net dealer inventory and investment gains on the income statement.

Note 11 – Convertible Subordinated Notes and Debt Issuance Costs

The Company had \$16.7 million and \$16.8 million in aggregate principal amount of the Company's senior subordinated convertible notes due 2011 ('Notes') outstanding as of December 31, 2008 and September 30, 2008, respectively. The Notes are general unsecured obligations of the Company and bear interest at the rate of 7.625% per annum, payable quarterly in arrears.

During October 2008, notes with a principal balance of \$0.1 million were converted into 4,359 common shares at the election of the Note holders. As of December 31, 2008, the Notes are currently convertible by the holders into 656,936 shares of common stock of the Company, at a conversion price of \$25.47 per share. If the dollar-volume weighted average price of the common stock exceeds \$38.25, subject to certain adjustments, for any twenty out of thirty consecutive trading days, the Company will have the right to require the holders of the Notes to convert all or any portion of the Notes into shares of Common Stock at the then-applicable conversion price.

In the event that the consolidated interest coverage ratio for the 12 months preceding the end of any fiscal quarter is less than 2.0, the interest rate on the Notes will be increased by 2.0% to 9.625% per annum, effective as of the first day of the following fiscal quarter. Through the quarter ended December 31, 2008, no such increase has been necessary. Holders may redeem their Notes at par if the interest coverage ratio set forth in the Notes is less than 2.75 for the twelve-month period ending December 31, 2009.

The Company entered into a separate Registration Rights Agreement with the holders of the Notes, under which the Company was required to file with the U.S. Securities and Exchange Commission ('the SEC') a Registration Statement on Form S-3 within a specified period of time. The Registration Statement was declared effective by the SEC on October 24, 2006. The Company is required, under the Registration Rights Agreement, to maintain the effectiveness of the Registration Statement, failing which it could become liable to pay holders of the Notes liquidated damages of 1% of the value of the Notes upon a failure to maintain effectiveness of the Registration Statement, plus a further 1% for every 30 days that it remains ineffective thereafter, up to an aggregate maximum of 10% of the value of the Notes. At December 31, 2008 the Company was in compliance with its requirements under the Registration Rights Agreement.

[Table of Contents](#)

Note 12 – Commitments and Contingencies

As discussed in Note 8 – Goodwill, the Company has a contingent liability relating to the acquisition of INTL Gainvest which may result in the payment of additional consideration in June 2009.

As discussed in Note 11 – Convertible Subordinated Notes and Debt Issuance Costs, the Notes may be converted into shares of common stock of the Company at any time by the holders. The Notes also contain a provision to increase the interest rate by 2%, subject to certain conditions measured on a quarterly basis.

Note 13 – Capital and Other Regulatory Requirements

The Company's wholly-owned subsidiary INTL Trading, Inc. ('INTL Trading') is a registered broker dealer and member of the Financial Industry Regulatory Authority ("FINRA") and is subject to the SEC Uniform Net Capital Rule 15c3-1. This rule requires the maintenance of minimum net capital, and requires that the ratio of aggregate indebtedness to net capital not exceed 15 to 1. Equity capital may not be withdrawn if the resulting net capital ratio would exceed 10 to 1. At December 31, 2008, INTL Trading's net capital was \$1.5 million, which was \$0.5 million in excess of its minimum requirement.

INTL Capital Limited ('INTL Capital') is regulated by the Dubai Financial Services Authority in the United Arab Emirates, and is subject to a minimum capital requirement of approximately \$0.5 million as of December 31, 2008.

Note 14 – Stock-Based Compensation

Stock-based compensation expense is included within 'Compensation and benefits' in the condensed consolidated income statements and totaled \$0.4 million and \$0.3 million for the three months ended December 31, 2008 and 2007, respectively.

Stock Option Plans

The Company sponsors a stock option plan for its directors, officers, employees and consultants. At December 31, 2008, 32,344 shares were authorized for future grant under our stock plan. Awards that expire or are canceled generally become available for issuance again under the plan.

Fair value is estimated at the grant date based on a Black-Scholes-Merton option-pricing model using the following weighted average assumptions:

	Three Months Ended December 31,	
	2008	2007
Expected stock price volatility	71%	60%
Expected dividend yield	0%	0%
Risk free interest rate	1.67%	3.28%
Average expected life (in years)	2.80	3.00

Expected stock price volatility rates are based on the historical volatility of the Company's common stock. The Company has not paid dividends in the past and does not currently expect to do so in the future. Risk free interest rates are based on the U.S. Treasury yield curve in effect at the time of grant for periods corresponding with the expected life of the option or award. The average expected life represents the estimated period of time that options or awards granted are expected to be outstanding, based on the Company's historical share option exercise experience for similar option grants.

[Table of Contents](#)

The following is a summary of stock option activity through December 31, 2008:

	<u>Shares Available for Grant</u>	<u>Number of Options Outstanding</u>	<u>Weighted Average Price</u>	<u>Weighted Average Remaining Term (in years)</u>	<u>Aggregate Intrinsic Value (\$ millions)</u>
Balances at September 30, 2008	464,559	584,207	\$ 9.31	3.27	\$ 8.6
Granted	(432,215)	432,215	\$ 7.06		
Exercised		(15,950)	\$ 5.74		
Balances at December 31, 2008	<u>32,344</u>	<u>1,000,472</u>	<u>\$ 8.39</u>	<u>4.25</u>	<u>\$ 0.2</u>
Exercisable at December 31, 2008		<u>492,921</u>	<u>\$ 6.77</u>	<u>3.15</u>	<u>\$ 0.9</u>

The Company settles stock option exercises with newly issued shares of common stock. The total compensation cost not yet recognized for non-vested awards of \$1.9 million has a weighted average period of 2.73 years over which the compensation expense is expected to be recognized.

Restricted Stock Plan

The Company sponsors a restricted stock plan for its directors, officers and employees. At December 31, 2008, 561,108 shares were authorized for future grant under our restricted stock plan. Awards that expire or are canceled generally become available for issuance again under the plan. The Company settles restricted stock with newly issued shares of common stock.

The following is a summary of restricted stock activity through December 31, 2008:

	<u>Shares Available for Grant</u>	<u>Number of Unvested Shares Outstanding</u>	<u>Weighted Average Grant Date Fair Value</u>	<u>Weighted Average Remaining Term (in years)</u>	<u>Aggregate Intrinsic Value (\$ millions)</u>
Balances at September 30, 2008	657,184	84,397	\$ 26.01	2.25	\$ 2.0
Granted	(96,076)	96,076	\$ 8.07		
Vested		(14,160)	\$ 26.97		
Balances at December 31, 2008	<u>561,108</u>	<u>166,313</u>	<u>\$ 15.56</u>	<u>3.22</u>	<u>\$ 1.4</u>

The total compensation cost not yet recognized of \$2.3 million has a weighted average period of 3.22 years over which the compensation expense is expected to be recognized. Compensation expense is amortized on a straight-line basis over the vesting period. Restricted stock grants are included in the Company's total issued and outstanding common shares.

Note 15 – Taxes

Deferred income tax balances reflect the effects of temporary differences between the carrying amounts of assets and liabilities and their tax bases and are stated at enacted tax rates expected to be in effect when taxes are actually paid or recovered.

In June 2006, the FASB issued FIN 48, *Accounting for Uncertainty in Income Taxes*. FIN 48 clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with FASB Statement No. 109, *Accounting for Income Taxes*. This interpretation prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This interpretation also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. The Company adopted the provisions of FIN 48 on October 1, 2007 and was not required to record any cumulative effect adjustment to retained earnings as a result of this adoption. The Company recognizes potential interest and penalties as a component of income tax expense.

The Company and its subsidiaries file income tax returns with the U.S. federal jurisdiction and various state and foreign jurisdictions.

Note 16 – Discontinued Operations

On August 1, 2008, the Company notified the employees of its Hong Kong subsidiary, INTL Global Currencies (Asia) Ltd., of its intention to discontinue its foreign exchange margin trading operations. The Company has effected an orderly liquidation of this subsidiary. The results of operations for INTL Global Currencies (Asia) Ltd., which were previously included within the foreign exchange trading segment, are included within discontinued operations on the income statement for all periods presented. The loss from discontinued operations was \$0.2 million in Q1 2008.

Note 17 – Segment Analysis

The Company's activities are currently divided into five functional areas: international equities market-making, foreign exchange trading, commodities trading, international debt capital markets and asset management.

International Equities Market-Making

Through INTL Trading, the Company acts as a wholesale market maker in select foreign securities including unlisted ADRs and foreign ordinary shares. INTL Trading provides execution and liquidity to national broker-dealers, regional broker-dealers and institutional investors.

Foreign Exchange Trading

The Company trades currencies, with a focus on illiquid currencies of developing countries. The Company's customers are financial institutions, multi-national corporations, government organizations and charitable organizations operating in these developing countries. In addition, the Company executes trades based on the foreign currency flows inherent in the Company's existing business activities. The Company primarily acts as a principal in buying and selling foreign currencies on a spot basis. The Company derives revenue from the difference between the purchase and sale prices.

Commodities Trading

The Company provides a full range of trading and hedging capabilities to select producers, consumers, recyclers and investors in precious metals and certain base metals. Acting as a principal, the Company commits its own capital to buy and sell the metals on a spot and forward basis.

The Company records all of its physical commodities revenues on a gross basis. Operating revenues and losses from the Company's commodities derivatives activities are recorded in 'Net dealer inventory and investment gains'. All of the Company's other businesses report their revenues on a net basis. Inventory for the commodities business is valued at the lower of cost or market value, under the provisions of ARB No. 43. The Company generally mitigates the price risk associated with commodities held in inventory through the use of derivatives. This price risk mitigation does not generally qualify for hedge accounting under GAAP. In such situations, unrealized gains in inventory are not recognized under GAAP, but unrealized gains and losses in related derivative positions are recognized under GAAP. As a result, the Company's reported earnings from commodities trading are subject to significant volatility.

International Debt Capital Markets

The Company arranges international debt transactions and asset backed securitizations for issuers located primarily in emerging markets. These transactions include bond issues, syndicated loans, and asset backed securitizations, as well as forms of other negotiable debt instruments.

Asset Management

The asset management segment revenues include fees, commissions and other revenues received by the Company for management of third party assets and investment gains or losses on the Company's investments in managed funds and proprietary accounts managed either by the Company's investment managers or by independent investment managers.

Other

All other transactions that do not relate to the operating segments above are classified as 'Other'. Certain cash accounts and balances were maintained to support the administration of all of the operating segments. These multi-segment assets were allocated to 'Other'. Revenue reported for 'Other' includes interest income but not interest expense.

[Table of Contents](#)

The total revenues reported combine gross revenues for the commodities business and net revenues for all other businesses. In order to reflect the way that the Company's management views the results, the tables below also reflect the segmental contribution to 'Operating revenues', which is shown on the face of the condensed consolidated income statements and which is calculated by deducting physical commodities cost of sales from total revenues.

Segment data includes the profitability measure of net contribution by segment. Net contribution is one of the key measures used by management to assess the performance of each segment and for decisions regarding the allocation of the Company's resources. Net contribution is calculated as revenue less direct cost of sales, clearing and clearing related charges and variable trader bonus compensation. Variable trader bonus compensation represents a fixed percentage of an amount equal to revenues produced less clearing and related charges, base salaries and an overhead allocation.

Inter-segment revenues, charges, receivables and payables are eliminated between segments, except revenues and costs related to foreign currency transactions undertaken on an arm's length basis by the foreign exchange trading business for the equity and debt trading business. The foreign exchange trading business competes for this business as it does for any other business. If its rates are not competitive the equity and debt trading businesses buy or sell their foreign currency through other market counter-parties. The profit or loss made by the foreign exchange trading business on these transactions is not quantifiable.

[Table of Contents](#)

Information concerning operations in these segments of business is shown in accordance with SFAS No. 131 as follows:

(In millions)	Three Months Ended	
	December 31,	
	2008	2007

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis should be read in conjunction with the financial statements and notes thereto appearing elsewhere in this report. This Quarterly Report on Form 10-Q contains “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. These forward-looking statements involve known and unknown risks and uncertainties, many of which are beyond the Company’s control, including adverse changes in economic, political and market conditions, losses from the Company’s market-making and trading activities arising from counter-party failures and changes in market conditions, the possible loss of key personnel, the impact of increasing competition, the impact of changes in government regulation, the possibility of liabilities arising from violations of federal and state securities laws and the impact of changes in technology in the securities and commodities trading industries. Although the Company believes that its forward-looking statements are based upon reasonable assumptions regarding its business and future market conditions, there can be no assurances that the Company’s actual results will not differ materially from any results expressed or implied by the Company’s forward-looking statements. The Company undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. Readers are cautioned that any forward-looking statements are not guarantees of future performance.

Principal Activities

International Assets Holding Corporation and its subsidiaries (collectively “INTL” or “the Company”) form a financial services group focused on select international markets. The Company commits its capital and expertise to market-making and dealing in financial instruments, currencies and commodities, and to asset management. The Company’s activities are divided into five reportable business segments - international equities market-making, foreign exchange trading, commodities trading, international debt capital markets and asset management.

International Equities Market-Making. The Company is a leading US market maker in select foreign securities, including unlisted American Depository Receipts and foreign common shares. The Company provides execution and liquidity primarily to U.S.-based wire houses, regional broker-dealers and institutional investors.

Foreign Exchange Trading. The Company trades select illiquid currencies of developing countries. The Company’s target customers are financial institutions, multi-national corporations, and governmental and charitable organizations operating in these developing countries. In addition, the Company executes trades based on the foreign currency flows inherent in its existing international securities activities. The Company primarily acts as a principal in buying and selling foreign currencies on a spot basis.

Commodities Trading. The Company provides a full range of over-the-counter precious and base metals trading and hedging capabilities to producers, consumers, recyclers and investors with a particular focus on transactions that include physical delivery. Acting as a principal, the Company commits its capital to buy and sell the metals on a spot and forward basis.

International Debt Capital Markets. The Company actively trades a wide variety of international debt instruments including both investment grade and higher yielding emerging market bonds with particular focus on smaller emerging market sovereign, corporate and bank bonds that trade worldwide on an over-the-counter basis. The Company also originates international debt transactions for issuers located primarily in emerging markets. This includes bond issues, syndicated loans, asset securitizations as well as forms of other negotiable debt instruments.

Asset Management. The Company provides asset management services through INTL Consilium, LLC, an asset management joint venture in which it holds a 50.1% interest, and through two wholly owned subsidiaries; INTL Capital Ltd. and Gainvest S.A. Sociedad Gerente de Fondos Comunes de Inversion. INTL Consilium, LLC acts as the investment manager for private investment funds organized by INTL Consilium, LLC and others. INTL Capital Ltd. acts as the investment adviser to INTL Trade Finance Fund Ltd. Gainvest acts as an investment adviser to three investment funds organized and traded in Argentina.

Selected Summary Financial Information

As discussed in previous filings and elsewhere in this Form 10-Q, the requirements of accounting principles generally accepted in the U.S. (“GAAP”) to carry derivatives at fair market value but physical commodities inventory at the lower of cost or market value have a significant temporary impact on our reported earnings. Under GAAP, gains and losses on commodities inventory and derivatives which the Company intends to be offsetting are often recognized in different periods. Additionally, GAAP does not require us to reflect changes in estimated values of forward commitments to purchase and sell commodities.

For these reasons, management assesses the Company’s operating results on a marked-to-market basis. Management relies on these adjusted operating results to evaluate the performance of the Company’s commodities business segment and its personnel.

Under “marked-to-market basis” in the tables below are the Company’s adjusted operating revenues, pro forma income from continuing operations, pro forma net income, adjusted EBITDA and adjusted stockholders’ equity, which have been adjusted to reflect the marked-to-market differences in the Company’s commodities business during each period (in the case of operating revenues and net income) and the cumulative differences (in the case of stockholders’ equity). The Company has also included the estimated tax liability which would have been incurred as a result of these adjustments, utilizing a blended tax rate of 37.5%.

Pro Forma Adjusted Financial Information (non-GAAP) (UNAUDITED)

(In millions, except employee count and ratios)	Three Months Ended December 31,	
	2008	2007
As reported on a GAAP basis:		
Operating revenues	\$ 29.6	\$ 42.0
Net income	\$ 3.3	\$ 12.9
Income from continuing operations	\$ 3.3	\$ 13.1
Stockholders' equity	\$ 74.5	\$ 49.9
Marked-to-market basis (unaudited, pro forma, non-GAAP):		
Adjusted operating revenues	\$ 31.0	\$ 28.7
Adjusted, pro forma income from continuing operations	\$ 4.2	\$ 4.9
Adjusted, pro forma net income	\$ 4.2	\$ 4.7
Adjusted EBITDA	\$ 9.1	\$ 11.5
Adjusted stockholders' equity	\$ 77.9	\$ 61.0
Trailing twelve months on marked-to-market basis (unaudited, pro forma, non-GAAP):		
Adjusted operating revenues	\$ 103	\$ 90
Adjusted, pro forma net income	\$ 11	\$ 12
Adjusted EBITDA	\$ 25	\$ 33
Adjusted return on average equity	15.1%	23.5%
The following marked-to-market adjustments were made to the GAAP basis numbers shown above (unaudited, pro forma, non-GAAP management data):		
Gross marked-to-market adjustment	1.4	(13.3)
Pro forma tax effect at 37.5%	(0.5)	5.1
After tax marked-to-market adjustment	<u>\$ 0.9</u>	<u>\$ (8.2)</u>
Cumulative after tax adjustment	<u>\$ 3.4</u>	<u>\$ 11.1</u>
Reconciliation of net income to adjusted EBITDA (non-GAAP)		
Net income	\$ 3.3	\$ 12.9
Minority interests	0.2	0.8
Income tax	2.5	8.2
Depreciation and amortization	0.2	0.3
Interest expense	2.3	3.0
Interest income	(0.8)	(0.4)
Gross marked-to-market adjustment	1.4	(13.3)
Adjusted EBITDA (non-GAAP)	<u>\$ 9.1</u>	<u>\$ 11.5</u>
Other Data:		
Employees	185	180
Compensation and benefits / adjusted operating revenues	43.9%	36.9%
Leverage ratio: Total assets to Equity	5.0	5.9

Adjusted operating revenues, adjusted net income, adjusted EBITDA and adjusted stockholders' equity are financial measures that are not recognized by GAAP, and should not be considered as alternatives to operating revenues, net income or stockholders' equity calculated under GAAP or as an alternative to any other measures of performance derived in accordance with GAAP. The Company has included these non-GAAP financial measures because it believes that they permit investors to make more meaningful comparisons of performance between the periods presented. In addition, these non-GAAP measures are used by management in evaluating the Company's performance.

Results of Operations

Set forth below is the Company's discussion of the results of its operations, as viewed by management, for the fiscal quarters ended December 31, 2008 and 2007 ("Q1 2009" and "Q1 2008") respectively. This discussion refers to both GAAP results and adjusted

[Table of Contents](#)

marked-to-market information, in accordance with the information presented above under the heading 'Pro Forma Adjusted Financial Information'. For the international equities, foreign exchange trading, international debt capital markets and asset management segments, there are no differences between the GAAP results and the adjusted marked-to-market results. Only the commodities trading segment has differences between the GAAP results and the adjusted marked-to-market results. However, this means that there are differences between the GAAP basis and marked-to-market basis numbers for total operating revenues, total contribution and net income. Please note that any term below that contains the word 'adjusted' refers to non-GAAP, marked-to-market information.

Financial Overview

The following table shows an overview of our financial results.

(in millions)	Three Months Ended December 31,		
	2008	% Change	2007
FINANCIAL OVERVIEW			
Adjusted total operating revenues (non-GAAP)	\$31.0	8%	\$ 28.7
Interest expense	2.3	(23)%	3.0
Net revenues (non-GAAP)	28.7	12%	25.7
Non-interest expenses	21.3	26%	16.9
Income before income tax and minority interest (non-GAAP)	7.4	(16)%	8.8
Pro forma income tax expense (non-GAAP)	3.0	(6)%	3.2
Minority interest in income of consolidated entities	0.2	(75)%	0.8
Income from continuing operations (non-GAAP)	4.2	(13)%	4.8
Loss from discontinued operations, net of taxes	—	(100)%	0.2

Pro forma income tax expense (non-GAAP)	<u>\$ 3.0</u>		<u>\$ 3.2</u>

Q1 2009 Operating Revenues vs. Q1 2008 Operating Revenues

The Company's operating revenues under GAAP for Q1 2009 and Q1 2008 were \$29.6 million and \$42.0 million, respectively. The Company's adjusted operating revenues were \$31.0 million in Q1 2009, 8% higher than the operating revenues of \$28.7 in Q1 2008. This was attributable to adjusted operating revenue increases of \$9.6 million (or 108%) in equities market-making and \$2.4 million (or 46%) in commodities trading, offset by decreases of \$1.0 million (or 16%) in foreign exchange trading and \$0.4 million (or 36%) in debt capital markets and a decrease in asset management operating revenues of from \$6.7 million in 2008 to negative \$0.8 million in 2009. The equities market-making segment benefited from the unusual levels of volatility in global equity markets during Q1 2009. The commodities trading results were largely driven by precious metals activity. Foreign exchange trading continued to perform well, producing its third best quarter ever. The lack of risk appetite caused by the global financial crisis continues to adversely affect our debt arrangement and placement business, accounted for in the debt capital markets segment. Reduced revenue and losses in the asset management segment arose as a result of reduced investment advisory fees related to redemptions from funds under management and to declining values of assets as a result of the global financial crisis as well as marked-to-market losses in the Company's proprietary investments in certain funds and accounts managed by the Company. The total assets under management in the Company's asset management business segment decreased from \$1.8 billion at December 31, 2007 to \$0.8 billion at December 31, 2008. See the segmental analysis below for additional information on activity in each of the segments.

[Table of Contents](#)

Q1 2009 Expenses vs. Q1 2008 Expenses

Interest expense: Interest expense decreased by 23% from \$3.0 million in Q1 2008 to \$2.3 million in Q1 2009 as a result of decreased average borrowings and lower interest rates. In mid-2008 the Company entered into two three-year interest rate swaps for a total of \$100 million. These were designated as cash flow hedges. See Note 10 to the condensed consolidated financial statements for further information. The Company pays a fixed 3.66% (on average), and receives a variable rate equal to one-month LIBOR. One-month LIBOR was lower than the fixed rate of 3.66% paid by the Company for most of Q1 2009, resulting in a net interest expense on the swaps. The effective portion of the interest expense on the swaps during Q1 2009 had the effect of increasing the Company's reported interest expense by \$0.2 million.

Non-interest expenses: The following table sets forth information concerning non-interest expenses.

(in millions)	Three Months Ended December 31,		
	2008	% Change	2007
NON-INTEREST EXPENSES			
Compensation and benefits	\$13.6	28%	\$10.6
Clearing and related expenses	4.9	29%	3.8
Other non-interest expenses			
- Occupancy and equipment rental	0.4	0%	0.4
- Professional fees	0.8	60%	0.5
- Depreciation and amortization	0.2	0%	0.2
- Business development	0.5	(29)%	0.7
- Insurance	0.1	0%	0.1
- Other	0.8	33%	0.6
Total other non-interest expenses	2.8	12%	2.5
Total non-interest expenses	<u>\$21.3</u>	<u>26%</u>	<u>\$16.9</u>

Non-interest expenses: Non-interest expenses increased by 26% from \$16.9 million in Q1 2008 to \$21.3 million in Q1 2009.

Compensation and Benefits: Compensation and benefits expense grew by 28% from \$10.6 million to \$13.6 million. These represented 64% of total non-interest expenses in Q1 2009, compared with 63% in Q1 2008. Total variable compensation paid to traders increased as a result of increased revenues. Administrative and executive bonus accruals, including deferred compensation expenses (a proportion of current year bonuses allocated to restricted stock awards is deferred and expensed as vesting occurs), were \$1.8 million in Q1 2009, compared with \$0.9 million in Q1 2008. Stock-based compensation expense in Q1 2009 was \$0.4 million, compared with \$0.3 million in Q1 2008. Salaries and benefits decreased 7% from \$5.0 million in Q1 2008 to \$4.7 million in Q1 2009. The number of employees declined from 195 at the beginning of Q1 2009 to 185 at the end of Q1 2009, compared with 178 employees at the end of Q1 2008.

Clearing and Related Expenses: Clearing and related expenses increased by 29% from \$3.8 million in Q1 2008 to \$4.9 million in Q1 2009. The increase was mainly a result of increased equities volumes and third-party commissions paid in the foreign exchange trading business.

Other Non-Interest Expenses: Other non-interest expenses increased by 12% from \$2.5 million in Q1 2008 to \$2.8 million in Q1 2009. There was a 60% increase in professional fees, mainly due to additional audit fees for fiscal 2008 and additional legal fees. Business development costs decreased by 29%, from \$0.7 million to \$0.5 million. Other increases related to the general expansion of the Company's business.

Provision for Taxes: The effective income tax rate on a GAAP basis was 42% in Q1 2009, compared with 37% in Q1 2008. This change was primarily due to changes in the geographic mix of profits and losses.

Our effective income tax rate can vary from period to period depending on, among other factors, the geographic and business mix of our earnings, the level of our pre-tax earnings and the level of our tax credits.

[Table of Contents](#)

Minority Interest: The minority interest in income of consolidated entities decreased from \$0.8 million in Q1 2008 to \$0.2 million in Q1 2009. This represents the minority interests in our two joint ventures, INTL Consilium and INTL Commodities DMCC, and in INTL Gainvest Capital Uruguay S.A.

Loss from Discontinued Operations: On August 1, 2008, the Company notified the employees of its Hong Kong subsidiary, INTL Global Currencies (Asia) Ltd., of its intention to discontinue its foreign exchange margin trading operations. The subsidiary has been closed down without any material expenses incurred beyond those accrued at September 30, 2008. The loss from discontinued operations, net of taxes, was \$0.2 million in Q1 2008.

[Table of Contents](#)

Q1 2009 vs. Q1 2008 Segmental Analysis

The adjusted contribution of all the Company's business segments was \$19.8 million in Q1 2008 and Q1 2009. Contribution consists of operating revenues less direct clearing and clearing related charges and variable compensation paid to traders. Variable compensation is paid to traders on the basis of a fixed percentage of the aggregate of revenues less clearing and related charges, base salaries and a fixed overhead allocation. Contribution is one of the key measures used by management to assess the performance of each segment.

International equities market-making – Operating revenues increased by 108% from \$8.9 million in Q1 2008 to \$18.5 million in Q1 2009. Both volumes and market volatility are the drivers of this business. Market volatility reached unprecedented levels during the quarter, in response to the global financial crisis. Equity market-making operating revenues include the trading profits earned by the Company before the related expense deduction for ADR conversion fees. These ADR fees are included in the condensed consolidated income statement as clearing and related expenses.

The contribution attributable to this segment increased 150% from \$4.4 million to \$11.0 million. Variable expenses expressed as a percentage of operating revenues decreased from 51% to 41%.

Foreign exchange trading – Operating revenues decreased by 16% from \$6.3 million in Q1 2008 to \$5.3 million in 2009. Although lower than both Q1 2008 and the fourth quarter of fiscal 2008, operating revenues in Q1 2009 were from an increasingly diverse customer base and were the third highest yet produced.

The contribution attributable to this segment decreased 20% from \$4.9 million to \$3.9 million. Variable expenses expressed as a percentage of operating revenues increased from 22% to 26%, mainly as a result of commissions paid to third-party introducers for additional business.

Commodities trading – Operating revenues under GAAP decreased from \$18.5 million in Q1 2008 to \$6.2 million in Q1 2009. Adjusted operating revenues increased by 46% from \$5.2 million in Q1 2008 to \$7.6 million in Q1 2009.

Precious metals adjusted operating revenues increased from \$0.9 million in Q1 2008 to \$6.0 million in Q1 2009. Base metals adjusted operating revenues decreased from \$4.3 million in Q1 2008 to \$1.6 million in Q1 2009. Precious metals operating revenues have increased as a result of increased customer business and increasing revenue flows from our Dubai joint venture and from our Singapore office. Base metals prices have decreased significantly since Q1 2008 and base metals adjusted operating revenues have declined because recycling is no longer as profitable and as a result of decreased activity.

The adjusted contribution attributable to this segment increased 33% from \$4.0 million to \$5.3 million. Variable expenses expressed as a percentage of operating revenues increased from 23% to 30%.

International debt capital markets – Operating revenues decreased by 36% from \$1.1 million in Q1 2008 to \$0.7 million in Q1 2009. The business focuses on the arranging and placing of debt issues and asset backed securitization. A sharp decline in the market's appetite for risk during calendar 2008 resulted in an overall decrease in operating revenue.

The contribution attributable to this segment decreased 30% from \$1.0 million to \$0.7 million.

Asset management – The Company's asset management segment revenues include management and performance fees, commissions and other revenues received by the Company for management of third party assets and investment gains or losses on the Company's investments in funds or proprietary accounts managed either by the Company's investment managers or by independent investment managers. The Company has invested in funds managed by the Company in order to provide seed capital. In addition, a proprietary account managed by the Company's asset management joint venture, INTL Consilium LLC, was established to produce a track record for the launch of a fund specializing in African investments. This fund, the Legacy Greater Africa Alpha Fund, advised by INTL Consilium LLC, was established in July 2008 with an initial \$25 million investment by an African bank.

Operating revenues decreased from \$6.7 million in Q1 2008 to a loss of \$0.8 million in Q1 2009. Redemptions from and losses in funds managed by the Company during Q1 2009 reduced total third party assets under management in this segment from \$1.2 billion at September 30, 2008 to \$0.8 billion at December 31, 2008. Assets under management at December 31, 2007 were \$1.8 billion. Management fees, earned on a lower asset base, and other income were \$2.2 million during Q1 2009.

[Table of Contents](#)

Net marked-to-market losses in proprietary investments (investments in funds and the proprietary account referred to above) were \$2.8 million. The fair value of the Company's proprietary investments was \$37.9 million at September 30, 2008 and \$36.7 million at December 31, 2008.

The contribution attributable to this segment decreased from \$5.5 million in Q1 2008 to a negative contribution of \$1.1 million in Q1 2009.

Variable vs. Fixed Expenses

(in millions)	Three Months Ended			
	December 31,			
	2008	% of Total	2007	% of Total
VARIABLE vs. FIXED EXPENSES				
Variable expenses allocated to segments	\$ 11.2	53%	\$ 8.9	53%
Administrative and executive bonuses	1.8	8%	0.9	5%
Bad debts	0.1	0%	—	0%
Total variable expenses	13.1	62%	9.8	58%
Fixed expenses	8.2	38%	7.1	42%
Total non-interest expenses	\$21.3	100%	\$16.9	100%

The Company aims to make its non-interest expenses variable to the greatest extent possible, and to keep its fixed costs as low as possible. The table above shows an analysis of the Company's total non-interest expenses for Q1 2009 and Q1 2008. Variable expenses consist of clearing and related expenses, variable compensation paid to traders, bonuses paid to operational, administrative and managerial employees and bad debt expenses. As a percentage of total non-interest expenses, variable expenses increased from 58% in Q1 2008 to 62% in Q1 2009.

Liquidity, Financial Condition and Capital Resources

The Company continuously reviews its overall capital needs to ensure that its capital base, including both stockholders' equity and debt, can appropriately support the anticipated capital needs of its operating subsidiaries.

At December 31, 2008, the Company had total equity capital of approximately \$74.5 million, convertible subordinated notes of approximately \$16.7 million, and bank loans of approximately \$104.2 million.

In spite of having net income of \$3.3 million during Q1 2009, stockholders' equity has declined from \$74.8 million at September 30, 2008 to \$74.5 million at December 31, 2008. The main reason for this is the loss of \$3.8 million for the quarter reported in the balance sheet as a component of other comprehensive income (loss), which was the effective portion of the loss on the Company's interest rate swaps. For further information, see Note 10 to the condensed consolidated financial statements.

A substantial portion of the Company's assets are liquid. The majority of the assets consist of financial instruments, which fluctuate depending on the level of customer business. At December 31, 2008, approximately 83% of the Company's assets consisted of cash, cash equivalents, receivables from brokers, dealers, clearing organization and customers, marketable financial instruments, and investments in managed funds. All assets are financed by the Company's equity capital, subordinated convertible notes, bank loans, short-term borrowings from financial instruments sold, not yet purchased, metals leases and other payables.

The Company's assets and liabilities may vary significantly from period to period due to changing customer requirements, and economic and market conditions, as well as the growth of the Company. The Company's total assets at December 31, 2008 and September 30, 2008, were \$372.5 million and \$438 million, respectively. The Company's operating activities generate or utilize cash as a result of net income or loss earned or incurred during each period and fluctuations in its assets and liabilities. The most significant fluctuations arise from changes in the level of customer activity, commodities prices and changes in the balances of financial instruments and commodities inventory.

[Table of Contents](#)

Approximately \$20 million of exchangeable foreign ordinary equities and ADR's are included within financial instruments owned and financial instruments sold, not yet purchased, respectively, on the Company's condensed consolidated balance sheet at December 31, 2008.

At December 31, 2008, the Company had bank facilities under which the Company could borrow up to a maximum of \$200 million, subject to certain conditions. At December 31, 2008 the total outstanding under all of these facilities was \$104.2 million. The Company is in compliance with all of its covenants to lenders.

The Company's largest bank facility is a one-year, renewable, revolving syndicated committed loan facility under which the Company's wholly-owned subsidiary, INTL Commodities, is entitled to borrow up to \$125 million, subject to certain conditions. There are six commercial banks that are the underlying lenders within the syndicate group. The loan proceeds are used to finance the activities of INTL Commodities and are secured by its assets. This facility is scheduled to expire on June 27, 2009. The Company has two credit facilities with a commercial bank that are committed until December 31, 2009, a general facility for \$35 million and a facility used by the Company's subsidiary, INTL Global Currencies, for \$25 million. The Company's Dubai joint venture, INTL Commodities DMCC, had an uncommitted bank facility at December 31, 2008 of \$15 million.

The interest rate on all of the Company's bank facilities is variable. In mid-2008 the Company entered into two three-year interest rate swaps for a total of \$100 million as a hedge against movements in LIBOR-based interest rates. The Company pays a fixed 3.66% (on average), and receives a variable rate equal to one-month LIBOR. One-month LIBOR was lower than the fixed rate of 3.66% paid by the Company for most of Q1 2009, resulting in a net interest expense on the swaps and an increase in total interest expense reported.

The Company receives cash from precious metals customers in Dubai and Singapore as collateral against margin trading positions. Where a right of setoff exists with the same counterparty under master netting agreements, the Company nets collateral balances against financial instruments. At December 31, 2008 the gross value of collateral balances held by the Company from its customers was approximately \$226 million, of which approximately \$190 million was netted against financial instrument balances. The net funding available to the Company's commodities business from collateral balances at December 31, 2008 was thus approximately \$36 million.

INTL Trading, the Company's broker-dealer subsidiary, is subject to the net capital requirements of the SEC relating to liquidity and net capital levels. At December 31, 2008, INTL Trading had regulatory net capital of \$1.5 million, which was \$0.5 million in excess of its minimum net capital requirement.

The Company's ability to receive distributions from INTL Trading is restricted by regulations of the SEC and FINRA. The Company's right to receive distributions from its subsidiaries is also subject to the rights of the subsidiaries' creditors, including customers of INTL Trading. INTL Trading paid dividends to the Company of approximately \$1.0 million and \$4.5 million during Q1 2008 and Q1 2009, respectively.

In September 2006 the Company completed a private placement of \$27 million of 7.625% subordinated convertible notes ('the Notes'), of which \$16.7 million in principal amount remain outstanding and unconverted. The Notes mature in September 2011. They are convertible at any time at the option of the holders at \$25.47 per share. The Notes contain customary anti-dilutive provisions. At the current conversion price, conversion would result in the issuance of 656,936 new shares of common stock. The Company may require conversion at any time if the dollar volume-weighted average share price exceeds 150% of the conversion price (or \$38.21) for 20 out of any 30 consecutive trading days. Holders may redeem their Notes at par if the interest coverage ratio set forth in the Notes is less than 2.75 for the twelve-month period ending December 31, 2009. The Company may redeem the Notes at 110% of par on March 11, 2010.

The Company entered into an agreement on April 30, 2007 to acquire the Gainvest group of companies ("INTL Gainvest") in South America. Pursuant to this acquisition, the Company made a payment of \$1.4 million to the sellers on June 1, 2008, equal to 25% of the aggregate revenues of INTL Gainvest earned for the year ended April 30, 2008, which has been recorded as additional goodwill. The Company is obligated to make a further payment on June 1, 2009 equal to 25% of the aggregate revenues of INTL Gainvest earned during the 12 months ended April 30, 2009. The revenues on which the 25% is calculated are subject to a minimum threshold of \$5.5 million and a maximum ceiling of \$11 million for this period. The aggregate revenues of INTL Gainvest in the eight-month period from May 1 to December 31, 2008 had not exceeded the minimum threshold of \$5.5 million and, accordingly, no accrual was made for deferred acquisition consideration at December 31, 2008.

[Table of Contents](#)

Certain subsidiaries of the Company that are regulated in foreign jurisdictions are subject to minimum capital requirements. INTL Capital Ltd. is regulated by the Dubai Financial Services Authority, in the United Arab Emirates, and is subject to a minimum capital requirement which at December 31, 2008 was approximately \$0.5 million.

On August 1, 2008, the Company notified the employees of its Hong Kong subsidiary, INTL Global Currencies (Asia) Ltd., of its intention to discontinue its margin foreign exchange trading operations. The Company incurred losses of approximately \$0.2 million and \$1.4 million in this subsidiary during Q1 2008 and fiscal 2008, respectively. The subsidiary has been closed down without any material expenses incurred beyond those accrued at September 30, 2008.

The Company's cash and cash equivalents decreased from approximately \$62.8 million at September 30, 2008 to approximately \$58.2 million at December 31, 2008, a net decrease of approximately \$4.6 million. The principal components of this were net cash of \$10.4 million provided by operating activities and net cash of \$15.6 million used in financing activities (paying down bank facilities).

The Company is continuously evaluating opportunities to expand its business. Expansion of the Company's activities will require funding and will have an effect on liquidity.

Critical Accounting Policies

The Company's condensed consolidated financial statements are prepared in accordance with generally accepted accounting principles. The Company's significant accounting policies are described in the Summary of Significant Accounting Policies in the consolidated financial statements set forth in the Company's 10-K for the year ended September 30, 2008.

As disclosed in Note 1 to the condensed consolidated financial statements, the Company has adopted SFAS 159 and SFAS 157 with effect from Q1 2009. The adoption of SFAS 159 has not resulted in the valuation of any additional categories of financial assets or liabilities at fair value than was the case before adoption. The adoption of SFAS 157 has resulted in additional disclosures which are set forth in Note 5 to the condensed consolidated financial statements. At December 31, 2008 the Company had a total of \$19.8 million of financial assets at fair value in the level 3 category, representing 5.3% of total assets and 11.0% of total financial assets at fair value. Of the \$19.8 million, \$11.1 million relates to the Company's investment in the INTL Trade Finance Fund, whose underlying assets are short-term, trade-related debt instruments and \$5.5 million relates to corporate bonds. These assets are purchased and sold on a principal-to-principal basis and their value is dependent on estimates of yields in small, inactive and specialized markets. The remaining \$3.1 million is comprised of \$1.8 million in pre-IPO proprietary investments, valued at cost less an appropriate liquidity provision, and \$1.3 million in hedge fund investments.

The Company believes that of its significant accounting policies, those described below may, in limited instances, involve a high degree of judgment and complexity. These critical accounting policies may require estimates and assumptions that affect the amounts of assets, liabilities, revenues and expenses reported in the condensed consolidated financial statements. Due to their nature, estimates involve judgment based upon available information. Actual results or amounts could differ from estimates and the difference could have a material impact on the financial statements. Therefore, understanding these policies is important in understanding the reported results of operations and the financial position of the Company.

Valuation of Financial Instruments, Investments in Managed Funds and Foreign Currencies. The Company's financial instruments and investments in managed funds are reflected in the financial statements at fair value or amounts that approximate fair value. Unrealized gains and losses related to these financial instruments are reflected in net earnings. Where available, the Company uses prices from independent sources such as listed market prices, or broker or dealer price quotations. Fair values for certain derivative contracts are derived from pricing models that consider current market and contractual prices for the underlying financial instruments or commodities, as well as time value and yield curve or volatility factors underlying the positions. In some cases, even where the value of a financial instrument is derived from an independent market price or broker or dealer quote, certain assumptions may be required to determine the fair value. However, these assumptions may be incorrect and the actual value realized upon disposition could be different from the current carrying value. The value of foreign currencies, including foreign currencies sold, not yet purchased, are converted into their U.S. dollar equivalents at the foreign exchange rates in effect at the close of business at the end of the accounting period. For foreign currency transactions completed during each reporting period, the foreign exchange rate in effect at the time of the transaction is used.

[Table of Contents](#)

The application of the valuation process for financial instruments and foreign currencies is critical because these items represent a significant portion of the Company's total assets. The accuracy of the valuation process allows the Company to report accurate financial information. Valuations for substantially all of the financial instruments held by the Company are available from independent publishers of market information. The valuation process may involve estimates and judgments in the case of certain financial instruments. Given the wide availability of pricing information and the high degree of liquidity of the majority of the Company's assets, there is insignificant sensitivity to changes in estimates and insignificant risk of changes in estimates having a material effect on the Company. The basis for valuing financial instruments or investments in managed funds has not undergone any change.

Revenue Recognition. The revenues of the Company are derived principally from realized and unrealized trading income in securities, derivative instruments, commodities and foreign currencies purchased or sold for the Company's account. Realized and unrealized trading income is recorded on a trade date basis. Securities owned and securities sold, not yet purchased and foreign currencies sold, not yet purchased, are stated at market value with related changes in unrealized appreciation or depreciation reflected in net dealer inventory and investment gains. Fee and interest income are recorded on the accrual basis and dividend income is recognized on the ex-dividend date.

Revenue on commodities that are purchased for physical delivery to customers and that are not readily convertible into cash is recognized at the point in time when the commodity has been shipped, title and risk of loss has been transferred to the customer, and the following conditions have been met: persuasive evidence of an arrangement exists, the price is fixed and determinable, and collectability of the resulting receivable is reasonably assured.

The critical aspect of revenue recognition for the Company is recording all known transactions as of the trade date of each transaction for the financial period. The Company has developed systems for each of its businesses to capture all known transactions. Recording all known transactions involves reviewing trades that occur after the financial period that relate to the financial period. The accuracy of capturing this information is dependent upon the completeness and accuracy of data capture of the operations systems and the Company's clearing firm.

Physical Commodities Inventory. Physical commodities inventory is valued at the lower of cost or market value, determined using the specific identification weighted average price method. The Company separately discloses the value of commodities in process, which include commodities in the process of being recycled, and finished commodities. The Company generally seeks to mitigate the price risk associated with physical commodities held in inventory through the use of derivatives. This price risk mitigation does not generally qualify for hedge accounting under GAAP. Any unrealized gains in physical commodities inventory are not recognized under GAAP, but unrealized gains and losses in related derivative positions are recognized under GAAP. As a result, the Company's reported commodities trading earnings are subject to volatility.

Effects of Inflation

Because the Company's assets are, to a large extent, liquid in nature, they are not significantly affected by inflation. Increases in the Company's expenses, such as compensation and benefits, clearing and related expenses, occupancy and equipment rental, due to inflation, may not be readily recoverable from increasing the prices of services offered by the Company. In addition, to the extent that inflation results in rising interest rates or has other adverse effects on the financial markets and on the value of the financial instruments held in inventory, it may adversely affect the Company's financial position and results of operations.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

See also Note 6 to the condensed consolidated financial statements, 'Financial Instruments with Off-Balance Sheet Risk and Concentrations of Credit Risk'.

The Company conducts its market-making and trading activities predominantly as a principal, which subjects its capital to significant risks. These risks include, but are not limited to, absolute and relative price movements, price volatility and changes in liquidity, over which the Company has virtually no control. The Company's exposure to market risk varies in accordance with the volume of client-driven market-making transactions, the size of the proprietary positions and the volatility of the financial instruments traded.

[Table of Contents](#)

The Company seeks to mitigate exposure to market risk by utilizing a variety of qualitative and quantitative techniques:

- Diversification of business activities and instruments
- Limitations on positions
- Allocation of capital and limits based on estimated weighted risks
- Daily monitoring of positions and mark-to-market profitability

The Company utilizes derivative products in a trading capacity as a dealer, to satisfy client needs and mitigate risk. The Company manages risks from both derivatives and non-derivative cash instruments on a consolidated basis. The risks of derivatives should not be viewed in isolation, but in aggregate with the Company's other trading activities.

Management believes that the volatility of revenues is a key indicator of the effectiveness of its risk management techniques. The graph below summarizes volatility of the Company's daily revenue, determined on a marked-to-market basis, during the three months ended December 31, 2008.

[Table of Contents](#)

In the Company's securities market-making and trading activities, the Company maintains inventories of equity and debt securities. In the Company's commodities market-making and trading activities, the Company's positions include physical inventories, forwards, futures and options. The Company's commodity trading activities are managed as one consolidated book for each commodity encompassing both cash positions and derivative instruments. The Company monitors the aggregate position for each commodity in equivalent physical ounces or metric tons. The table below illustrates, for the nine months ended December 31, 2008, the Company's greatest gross, average gross, greatest net long, greatest net short and average net day-end positions by business segment.

(In millions)	Greatest Gross	Average Gross	Greatest Net Long	Greatest Net Short	Average Net
Equity	\$ 16.6	\$ 10.5	\$ 12.6	\$ (0.8)	\$ 5.7
Foreign Exchange	20.1	10.3	13.3	(6.5)	4.4
Commodities	3.8	1.6	1.2	(3.2)	(1.3)
Asset Management (Funds & Other Investment)	n/a	n/a	32.9	n/a	30.0

Item 4. Controls and Procedures

In connection with the filing of this Form 10-Q, the Company's management, including the Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of the Company's disclosure controls and procedures as of December 31, 2008. The Company's Chief Executive Officer and Chief Financial Officer have concluded that the Company's disclosure controls and procedures were effective as of December 31, 2008.

A control system can provide only reasonable, not absolute, assurance that the objectives of the control system are met. As a result, there can be no assurance that a control system will succeed in preventing all possible instances of error and fraud. The Company's disclosure controls and procedures are designed to provide reasonable assurance of achieving their objectives, and the conclusions of the Company's Chief Executive Officer and Chief Financial Officer are made at the "reasonable assurance" level.

There were no changes in the Company's internal controls over financial reporting during the quarter ended December 31, 2008 that materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Part II. OTHER INFORMATION

Item 1. Legal Proceedings

In light of the nature of the Company's activities, it is possible that the Company may be involved in litigation in the future, which could have a material adverse impact on the Company and its financial condition and results of operations.

Item 1A. Risk Factors

Information regarding risks affecting the Company appears in Part I, Item 1A of the Company's Annual Report on Form 10-K for the fiscal year ended September 30, 2008. These are not the only risks facing the Company. Additional risks and uncertainties not currently known to us or that management currently considers to be non-material may in the future adversely affect the Company's business, financial condition and operating results.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

During the quarter ended December 31, 2008, the Company repurchased 11,257 shares at an average price of \$10.52. On November 20, 2008, the Company's Board of Directors renewed the Company's share repurchase authorization for an amount of \$5 million in shares of the Company's common stock. No share repurchases have occurred since the date of this authorization.

<u>Exhibit No.</u>	<u>Description</u>
(31.1)	Certification of Chief Executive Officer, pursuant to Rule 13a – 14(a).
(31.2)	Certification of Chief Financial Officer, pursuant to Rule 13a – 14(a).
(32.1)	Certification of Chief Executive Officer, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
(32.2)	Certification of Chief Financial Officer, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

SECTION 302 CERTIFICATION

I, Sean M. O'Connor, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q of International Assets Holding Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal controls over financial reporting, or caused such internal controls over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
